

Workshop by ibidi

Cell-Based Assays and Live Cell Imaging

Date: Tuesday, August 30, 2022

Time: 9.00 – 16.00 h

Location: Amsterdam UMC locatie AMC, Imaging Facility, Room M3-108, Meibergdreef 9

Topics:

High quality images of cells, with high spatial and temporal resolution, require not only the appropriate technical equipment to create them, but also careful attention to sample preparation.

This seminar will focus on how to link optimized cell culture with cell-based assays and high-end microscopy. Methods such as immunofluorescence, 3D culture, and micropatterning will be presented to give a deeper insight into ibidi's integrated approach to cell-based assays.

- Introduction to cell-based assays and live cell imaging
- Hands-on session on ibidi labware
- Demonstration of the NEW ibidi Stage Top Incubation System - Silver Line

Speaker:

Dr. Christiane Thanisch

Sales & Application Manager

ibidi GmbH
